

Comfort Line Inc. – Light Years Ahead®

Leading the Fiberglass Window and Door Industry. Supplying window and door systems and pultruded fiberglass profiles (FiberFrame™ Technology) to window and door distributors and manufacturers worldwide.

Our company has nearly 20 years experience pultruding complex, hollow, thin-walled profiles for the fenestration industry. We have recently developed proprietary and patented technology for pultruding complex fenestration shapes with multiple cavities and large quantities of reinforcements.

We also provide assistance and training establishing FRP window & door operations. The advice includes assistance in selecting and setting up window & door fabrication equipment based on desired production quantities.
