REUSED STUDY TOUR USA - 2009 Contaminated Sediments Remediation

For Sediment Processing Contractors
Public Authorities - Owners of Water Reclamation Plants
Environmental Engineers and Consultants

WHO IS REUSED?

REUSED is a Netherlands based European Foundation, active in the field of remediation of sediments and sludges.

REUSED organizes international conferences on these subjects, including study tours with site visits. Last event was the London Olympic Park remediation conference with site visits, called: "The 5th European Conference on Contaminated Sediments - East London's Canals Reused "Reuse of Waterways and Remediation of Sediments" For more information please go to <http://www.reused.nl>.

REUSED is now organizing a special study tour to Green Bay, Wisconsin, USA, where the Netherlands company Boskalis Dolman BV is currently doing the remediation of contaminated river sediments of the Green River, the largest river sediment processing contract ever. See program below.

Since we are arranging this trip via O'Hare Airport Chicago, we take the opportunity to combine this study tour with a visit to the largest Sewage Treatment Plant in the world, The Stickney Water Reclamation Plant in Chicago - operated by the "METROPOLITAN WATER RECLAMATION DISTRICT OF GREATER CHICAGO", who will give us a two hour technical tour.

REGISTRATION CLOSSES SEPTEMBER 18th 2009.

REUSED - USA STUDY TOUR - PROPOSED PROGRAM

Wednesday September 30

Flight Amsterdam- Chicago, KL 611, Dep. 10.30 AM, Check in Hotel Chicago.

Thursday, October 1st
